The pre-academy Half-Day Specialty Clinic will have elite training instructors featuring hand selected football coaches on staff. The purpose of the Half-Day Specialty Clinic is to give each athlete an opportunity to receive focused, intense position-specific technique training prior to the start of the football academy. This concentrated training session will help each participant have a more positive, productive academy experience. Clinic athletes range from age 7 to 18 with instructional squads being separated by age group and skill level to make sure proper instruction is given to each participant.

To be successful, professional players repeatedly practice daily the fundamentals and skills necessary for their individual positions. The

Half-Day Specialty Clinic offers players an opportunity to advance their position skills and fundamental techniques going into the academy. This program will be held the first day of the academy from 9:00 a.m. – 12:30 p.m. Lunch is included. Participants may attend the Half-Day Specialty Clinic by itself or attend both the Half-Day Specialty Clinic and Sports International Football Camp.

Football equipment needed: Mouth piece and football cleats.

## Lineman, Linebacker, Cornerback, Safety, and Defensive End Clinic

This clinic is designed to give each student athlete an opportunity to receive concentrated work in the position he plans to play during the academy and for his home football team. This experience will aid each participant in developing the ability to perform at the peak of his potential. Offensive and Defensive Lineman, Linebacker, Cornerback, Safety and Defensive Ends are some of the most unglamorous positions in football. They are the most unsung positions on the field, but they also contribute the most to the success or failure of every game! Great demands are placed on these positions! If you are going to play one of these positions next fall, you owe it to yourself and your teammates to learn and learn well every skill and technique available for the position you select. Our skilled coaching staff will teach you the skills and techniques needed to be successful during this concentrated training clinic just before the academy begins!

## Quarterback, Wide Receiver, Running Back, Tight End, and Offensive Lineman Clinic

These are the most skilled positions in football! They demand a great deal of discipline and correct repetition to perfect the skill and techniques necessary to perform at these positions. In most cases when fall practice begins, a football coach simply does not have the time needed to perfect these offensive positions. This clinic will aid each participant in developing the ability to perform at the peak of his potential during the academy and when he returns home. Our training techniques guide participants through a skill-learning process where every teaching experience has a purpose. This allows our staff to identify each participant's personal needs and develop their skills. Our skilled coaching staff will teach you the skills and techniques needed to be successful during this concentrated training clinic just before the academy begins!

## Our goal is to TEACH, TEACH and TEACH during these clinics!

The Half-Day Specialty Clinic is a great opportunity for every athlete that attends to better their football skills and take them to another level as a player. Remember: "When you are not in training, someone somewhere is and when you meet, they will win!"

**INSTRUCTORS:** Sports International brings in a large volume of college and/or high school coaches to work our football programs each summer. All clinics will be taught by skilled coaches who have achieved measures of greatness in these areas either as players, coaches, or both.

**TUITION:** Enrollment will be limited!
